        <p align="right">
                <b>This web application is specially designed for those who all are in search of
grocery products in their local town shops, which may be unpopular but the quality and price are
affordable with some users. Most of the people are now using online shopping portal which is
more familiar but they are importing from other countries so the arrival of a product is delay.
Also sometimes there may be a damage in that product or mismatch of a product. Even if they
exchange with new product the arrival time will increase so far. People who are ordered in
emergency will suffer by this issue. To overcome these issues we create an online web
application for local town shops, in each town the shop owners can register their shops and make
their business developed. Users can also buy things from local shops in their cities. By this
activity user can get the products in short time and avoiding of damage or mismatch of products
is less in percentage to go and get the local shops.
